Dear all,

At 20:20 on Oct. 15th, our team held a meeting on Google Meet as agreed upon. Participants included Eric, Kevin, Tianyi, and Steven.

In this meeting, we discussed the BDD assignment and settled on each team member doing a separate feature (which in turn corresponds to a resource). The specific features and the team member responsible are listed in the BDD document in our shared google drive.

Next step: Pick your feature, create your own branch, and once you're done, create a PR for other team members as reviewers.

Please feel free to add or correct any information.

Sincerely,
Tianyi Xu
